# iSpring Learn is a fast learning management system

with a built-in eLearning authoring toolkit,
easy tracking, and mobile access.

## What we do

We help L&D trainers, HR specialists, and corporate training managers launch eLearning in a matter of days, streamline online training easily, and track employees' results in real time.

## Clients use iSpring Learn for the following tasks:

❮❮ Employee onboarding

❮❮ Assessment and certification

❮❮ Compliance training

❮❮ Product training

❮❮ Sales training for office and remote employees

❮❮ Leadership training and growing talent

## The result: a ready-to-go learning portal for your employees in just 1 day

iSpring Learn is not just an online archive of work instructions, documents, and courses. It's a live learning environment that supports learners along the way, reminds them about deadlines, collects learning results, and sends completion certificates. You can set up integration with HR, CRM, and other internal systems via REST/SOAP API. Employees can learn when and where they want to from their laptops, tablets, or smartphones, using a handy mobile app.

## Use cases

**acer**

**Bekie Wesson**
Training Coordinator with Acer Service

" With iSpring, we trained over 200 high school students in 15 schools across the country to repair Chromebooks.

**L'ORÉAL**

**Bekie Wesson**
Training Coordinator with Acer Service

" Trained over 90 people in 7 countries in less than a year with 100% response rate for active users.

**HEALTHHELP** A WNS COMPANY

**Junellen Neese**
Corporate Training Manager at HealthHelp

" We completely revamped our new hire training program. Trainees' readiness for the job has risen from less than 80% to over 90%.

## Pricing

# $10,800

### per 300 active users/year

\* A user is considered active if they have logged in at least once during a month.

| Unlimited storage space for learning materials | Authoring toolkit for creating courses, quizzes, and role-plays | 24/7 technical support | Free iOS and Android apps allow learners to take courses on smartphones, even when offline |

## LMS deployment options

iSpring Learn is a cloud-based learning management system. All content, personal data, and statistics are securely stored on servers in the USA and in Europe (depending on your company's location) and are protected by iSpring's real-time backup technologies.

We can deploy the LMS on your server upon request. In this case, all data and learning materials will be stored locally within your network.

## What's included in the price

**Professional eLearning authoring toolkit**
A desktop solution for creating online courses, video lectures, quizzes, and simulations that can be published directly to iSpring Learn.

**Mobile app with offline access**
With the free iSpring Learn applications for iOS and Android, learners can study when and where they want to and save courses to their devices to take them while offline.

**Step-by-step learning paths**
Courses, assessments, and other training materials can be combined into learning paths and assigned to specific employees, groups, and roles.

**Events calendar**
A single tool to schedule all training activities: webinars, courses, assessments, and offline meetings.

**Certificates**
Upon course completion, the system automatically awards points and sends out completion certificates.

**Corporate learning portal**
The LMS's color scheme, logo, and URL can be easily customized on the control panel with just a couple of clicks.

**Easy-to-read reports**
There are over 20 ready-made reports to track how employees are taking courses and passing tests. For a more detailed training analysis, you can request a custom report.

**Built-in editor for creating articles online**
A WYSIWYG web editor for creating instructional articles and ebooks with images, quotes, infographics, and video.

**User management**
You can re-create your organization structure to make it easier to assign, manage, and track training by group, job title, or learning goal.

## FAQ

**What does the deployment process look like?**
The moment you sign up for iSpring Learn, your digital training portal is up and running. You only need to upload learning materials and invite employees.

**Do I need help from any specialists in order to launch the LMS?**
Signing up for iSpring Learn is as simple as ordering a book online – a person with no IT background can do it with ease. If you prefer a custom option (such as deploying an LMS on your server), we will contact your IT department and take care of all the technical details to make it a seamless process.

**What if I already have a number of instructions and training presentations?**
All existing learning materials can be uploaded to the portal. For example, you can add workshops and group training videos (FLV, MP4), audio files and call recordings (MP3, WAV), and documents and instructions (PDF, DOC(X), XLS, and PPT).

## Why iSpring

**Easy to use**

No IT background is needed to set up the LMS and start training employees.

**Top-notch customer care**

Highly trained customer support experts are online 24/7. 83% of all cases are resolved within 2 hours.

**Quick launch**

It takes just 1 day to deploy the LMS in your company.
